IMAN SULEMAN

Islamabad, Pakistan

EXPERIENCE

Web Developer Intern June 2025 – August 2025

RISETech Pvt. Ltd. NUST EME Campus | 8 Weeks

- Built multiple projects including a portfolio website, real-time weather app (OpenWeatherMap API), brewery list/detail app (OpenBreweryDB), Todo app, and login/signup form systems
- Developed proficiency in HTML5, CSS3 (Flexbox, Grid, glassmorphism, transitions), Bootstrap responsive layouts, and JavaScript (DOM manipulation, event handling, form validation)
- Gained hands-on experience with React.js including functional components, hooks (useState, useEffect, useMemo, useContext), React Router, and React Hook Form
- Integrated REST APIs with fetch, handled promises, managed loading states, and built dynamic list and detail pages
- Practiced component-based architecture, controlled forms, dynamic routing with useParams, and passing props and functions between components
- Used npm for package management, debugged with browser console tools, and managed projects via GitHub

Volunteer Educator September 2024 - November 2024

Step Ahead Welfare Society, Rawalpindi, Pakistan.

- Conducted regular sessions for non-school-going and underprivileged children, focusing on basic education, computer literacy, and ethical values
- Led engaging activities to teach 1D, 2D, 3D, and 4D shapes, helping children visualize abstract concepts through interactive methods
- Assisted school-going students with daily homework, improving their academic performance and confidence
- Introduced children to global issues such as climate change, cleanliness, and moral responsibility, encouraging awareness and empathy
- Promoted digital inclusion by familiarizing students with basic computer skills, aiming to bridge the digital divide in underserved communities
- Worked collaboratively in a team of university students to plan, organize, and deliver impactful weekly sessions

Rah-e-Haq Society Fall 2024

Worked as a member of Rah-e-Haq Society during the Fall 2024 semester, actively contributing to fundraising campaigns aimed at supporting humanitarian relief efforts for underprivileged communities and the people of Gaza. Assisted in organizing donation drives, awareness campaigns, and outreach initiatives, fostering teamwork, empathy, and social responsibility.

EDUCATION

Computer Science, Bachelor of Science

Aug 2023 – Present

FAST NUCES, Islamabad, Pakistan (www.nu.edu.pk)

My Cloth Application

As part of my web development experience, I designed and developed a responsive Fashion Store Website using HTML and CSS, Bootstrap and JavaScript. The website featured a clean and intuitive user interface with structured product sections, interactive navigation, and layout. This project enhanced my skills in frontend development, layout design, and delivering a user-centric digital shopping experience.

Centipede Game

Built a classic Centipede arcade game in C++ with smooth player controls, shooting mechanics, and score tracking—demonstrating strong logic and game loop implementation without OOP.

Candy Crush-Inspired Game

Developed a match-three puzzle game in C++ simulating Candy Crush mechanics—implemented tile swapping, grid-based matching, and scoring using 2D arrays.

Digital Counter (DLD Project)

In my Digital Logic Design (DLD) course project, I developed a 2-digit digital counter system capable of counting from 00 to 99 using a push-button interface. The system also included a reset functionality to bring the count back to zero. Implemented using basic logic gates and simulated through Proteus, the project strengthened my understanding of sequential logic design, simulation tools, and real-world digital system applications.

GameBoy Project

In my senior-level OOP coursework, I created a GameBoy Project featuring three interactive games—Wordle, Hangman, and Snake—using C++ and the SFML library. The project included a navigable game menu, background music, and dynamic UI rendering. It demonstrated my ability to apply object-oriented programming, integrate multimedia, and manage game state transitions within a unified game framework.

Zumba Game (COAL Project)

For my Computer Organization and Assembly Language (COAL) course, I developed a fun and educational Zumba Game using MASM x86 Assembly. The game was programmed with logic to simulate movement and interactive user feedback, showcasing my ability to work with low-level instructions, implement interactive logic, and creatively apply assembly language to engaging applications.

Social Awareness Documentary

As part of the final project for the course Ideology and Constitution of Pakistan (2024), I contributed to a social awareness documentary titled “Parhay Likhay Jahil Loog.” The project involved conducting public interviews in urban areas to explore the gap between formal education and social behavior. I participated in fieldwork, coordinated team efforts, and helped in video editing and content creation. The experience enhanced my communication, observation, and teamwork skills while promoting awareness of key societal issues in Pakistan.

Debunking or Proving a Conspiracy Theory, Myth, or Legend

As part of the final semester project for the course *Expository Writing*, I worked on the topic **“Proving the Mysteries of the Bermuda Triangle”** under the theme *Debunking or Proving a Conspiracy Theory, Myth, or Legend*. The project involved critical research, analysis of historical incidents, and scientific explanations to explore and explain the phenomena surrounding the Bermuda Triangle. It enhanced my academic writing, analytical thinking, and research interpretation skills.

Computer Networks Lab (CNET) – Network Topology Implementation

Designed and implemented a complete network topology in Packet Tracer with IP addressing scheme based on student roll numbers. Configured and deployed DHCP for dynamic IP allocation, EIGRP for dynamic routing, VLANs for network segmentation, Extended ACLs for traffic filtering, and route redistribution between routing protocols.

This project strengthened practical understanding of enterprise networking concepts and hands-on configuration skills.

Design & Analysis of Algorithms – Comparative Algorithm Analysis (Group Project)
Collaborated in a group project to implement and analyze three advanced data structures and algorithms: Merkle Tree, Heap, and Treap. Individually responsible for the Heap component — implemented the data structure from scratch, conducted theoretical complexity analysis, and benchmarked performance against the other algorithms. The project developed skills in algorithm design, asymptotic analysis, and empirical performance evaluation.

Xonix Game – Data Structures Project
Developed a fully featured Xonix arcade game in C++ as a team project, built entirely using core data structures without any built-in libraries. Implemented login/registration with credential validation, three progressive difficulty levels with increasing ghost count, simultaneous multiplayer on a shared board (arrow keys vs. WASD), dynamic leaderboard, matchmaking logic, friend system, player profile management, and save/load functionality. Underlying data structures included Linked Lists, Heaps, Hash Tables, Queues, and Trees to power all game systems.

Chrono Rift – Multi-Process Concurrent Game(Group Project)
Architected a multi-process, multi-threaded 2D game in C++ using POSIX APIs to demonstrate core OS concepts. Featured three isolated processes (Arbiter, Human, Strategic) communicating via shared memory. Implemented mutex/semaphore synchronization, thread-per-NPC model, stamina-based scheduling, signal-based stun and ultimate mechanics (SIGALRM, custom handlers), deadlock detection and resolution via a global resource table, contiguous memory allocation with swap logic, and a dedicated non-blocking rendering thread. Built and containerized using Docker with a functional Makefile.

Personal Portfolio Website
Designed and developed a fully responsive personal portfolio website using HTML, CSS, and Bootstrap. Features a mobile-first layout with structured sections covering About Me, Skills, Projects, and Contact. Emphasized clean UI with strong typography, visual hierarchy, and direct integration with GitHub and social platforms. Serves as a comprehensive digital resume reflecting development approach and design thinking.

Real-Time Weather Application
Built a responsive weather app using HTML, CSS, and JavaScript integrated with the OpenWeatherMap API. Displays real-time temperature, humidity, wind speed, feels-like data, and weather descriptions for any searched city. Features a modern glassmorphism UI with gradient containers and background blur, along with graceful error handling for invalid inputs and network failures. Strengthened skills in REST API integration, DOM manipulation, Flexbox layout, and modern CSS styling techniques.

HONORS & ACHIEVEMENTS

- **High Achiever Award**, awarded by Bahria College Islamabad for outstanding academic performance and excellence in FSC, 2023
- **Gold Medalist** in the CATSO Art and Creative Writing Contest 2022, recognized for exceptional creativity and expression in the category of ART
- Certificate Of Participation – Painting Competition as a part of Independence Day Celebrations of Pakistan, awarded by Directorate of Electronic Media and Publications Ministry of Information and Broadcasting August 13, 2024
- Certificate Of Merit – Services Rendered as House Prefect of Iqbal House, awarded by Bahria College Islamabad,2022-2023

- Certificate Of Participation – World Scout Day Hike on Margalla Hills, awarded by Islamabad Boy Scout Association, Girls Scout Hike, 22 February 2018
- Certificate Of Participation – Road Safety Awareness Session, awarded by Ministry of Communications National Road Safety Secretariat (NRSS), April 2019
- Certificate Of Participation – National Math Contest at Troff level, awarded by Global System for Educational Assessment (GSEA), 2017. Secured **5th position out of 12 at the school level, 8th out of 21 at the district level, and ranked 26th out of 438 nationwide.**
- Certificate Of Participation – Math Day (MCQs), 2015-16
- Certificate Of Merit – **For being a very intelligent student**, 2018
- Certificate Of Appreciation – for outstanding performance in Final Examination, 2021
- Certificate Of Appreciation – **Best Student of the Month**, 2020
- Consistently achieved **First Position and the Highest Percentage across all sections** from Grade 1 to Grade 6; secured Second Position in Grades 7 and 8
- Awarded First Prize in English Debate Competitions for three consecutive sessions: 2012–13, 2013–14, and 2015–16
- Certificate of Excellence - **Flawless Compering** during Interhouse Competitions (2015–2016)
- Secured Third Position in Urdu Calligraphy competitions (2012–13, 2015–16) and English Calligraphy competitions (2012–13, 2013–14)
- Appointed **Head Girl of the Junior Section** in Grade 5, recognized for leadership, discipline, and active participation in school events
- Served as **Secretary for Interhouse Competition**s during Junior High School, responsible for organizing events, maintaining records, and coordinating between houses

SKILLS

Programming Languages: C++, C, Python, PHP, Assembly Language (MASM x86)
Web Development: HTML & CSS, Bootstrap, JavaScript, Node.js, React.js, REST APIs, MUI, DOM Manipulation, Responsive & Mobile-First Design
Software & Tools: MATLAB, Proteus, SFML, Microsoft Visual Studio, Packet Tracer, VS Code,Docker
Networking & Systems: DHCP, EIGRP, VLAN, Extended ACLs, Route Redistribution, Network Topology Design, IP Addressing
Data Structures & Algorithms: Linked Lists, Heaps, Hash Tables, Queues, Trees, Treap, Merkle Tree, 2D Arrays, Algorithm Analysis & Benchmarking
Game Development: C++ Game Logic, Game Loop Design, SFML Multimedia Integration, Game State Management, Arcade Game Mechanics
UI/UX & Design: Glassmorphism, Flexbox, Typography & Visual Hierarchy, Responsive Layout Design, Intuitive Navigation
Digital Logic & Hardware: Sequential Logic Design, Logic Gates, Proteus Simulation, Digital Counter Systems
Soft Skills: Teamwork & Collaboration, Communication, Research & Analytical Thinking, Academic Writing, Content Creation, Video Editing
